

Roadmap: How to Get Free Crypto Tokens

Designed for learners who commented "FREE" – from the desk of @ankurdecodes

1. Introduction: Yes, You Can Earn Free Crypto — But Only If You Know the System

Most people think you need heavy investment to earn in crypto. But the truth is — Layer 2 blockchains, Web3 apps, DeFi platforms, and new crypto projects distribute FREE tokens through their airdrop programs.

These airdrops reward users for:

- Testing their network
- Interacting with their platform
- Being loyal early adopters
- Staying active in the community

Many people have earned \$10,000–\$50,000+ from airdrops like:

- Arbitrum
- Optimism
- Starknet
- Aptos
- Celestia

This roadmap will show you exactly how to start.

2. Step-by-Step Roadmap to Earn Free Crypto Tokens

STEP 1: Build Your Crypto Network (Very Important)

To qualify for big airdrops, you must interact and participate.

What to Do:

- Join Layer-2 blockchain communities (Discord + Telegram)
- Follow their Twitter/X accounts
- Participate in discussions
- Help others by solving basic queries
- Join early testnets

Why It Works:

Web3 companies love users who are:

- Active
- Helpful
- Early supporters

These users always get higher airdrop rewards.

STEP 2: Interact With Layer 2 Blockchains (Most Crucial Step)

Layer 2 blockchains are the most rewarding.

Top Layer 2 Networks to Focus On:

- Arbitrum
- Optimism
- Base
- zkSync
- StarkNet
- Linea
- Scroll

Your Tasks:

- Bridge small amounts of crypto
- Swap tokens
- Use their testnets
- Mint free NFTs (if available)
- Stake or delegate tokens
- Vote on governance proposals

These interactions help you qualify for airdrops.

STEP 3: Join Airdrop-Active Discord Communities

Almost every new crypto project has:

- Daily tasks
- XP systems
- Engagement rewards
- Early access events

What to Do in Discord:

- Complete tasks
- Engage in conversations
- Participate in quizzes/polls
- Test early apps

These actions increase your eligibility.

STEP 4: Become a Loyal User (Hold & Engage for 3–4 Weeks)

As mentioned in the video, loyalty matters.

What Loyalty Looks Like:

- Hold tokens for 3–4 weeks
- Avoid dumping tokens immediately
- Use their platform regularly
- Provide feedback
- Report bugs

Projects want loyal early users — and they reward them heavily.

STEP 5: Track the Right Sources (So You Never Miss Airdrops)

To earn airdrops, you must follow the right pages.

Websites to Follow:

- CoinMarketCap Airdrop page
- Airdrops.io
- DeFiLlama Airdrops
- CoinGecko News
- Crypto Twitter/X trending pages

Social Pages to Follow:

- Official blockchain handles (Arbitrum, Optimism, zkSync)
- Crypto KOLs
- Airdrop threads
- Web3 newsletters

This helps you act early.

3. Tools You Need to Start (Beginner-Friendly)

1. MetaMask Wallet

For interacting with L2 chains.

2. Hardware Wallet (optional)

For security.

3. Gas Fee Funds

Even small amounts like ₹200–₹500 help you interact.

4. AI Tools to Speed Up Research:

- ChatGPT
- Gemini
- Claude
- Perplexity

You can discover more research tools via [Techyuni.com](https://techyuni.com) or the Techyuni Chrome extension.

4. Practical Airdrop Tasks You Can Start Today

Here are simple daily tasks:

1. Bridge Tokens

Use:

- Arbitrum bridge
- zkSync bridge
- LayerZero bridge

2. Swap Tokens on DEXs

Try:

- Uniswap (Arbitrum)
- SushiSwap
- SpaceFi

3. Mint NFTs

Free mints often qualify you for airdrops.

4. Use DApps

Test multiple decentralized apps.

5. Provide Liquidity

Even small amounts help.
