Top Crypto Picks to Watch Right Now (Airdrops, Rewards & Safety Guide)

Structured exactly as discussed in the video — curated by @ankurdecodes

Why This Watchlist Matters

Not every crypto project is worth your time. Most free token opportunities come from:

- High-activity ecosystems
- Strong community-backed projects
- Legit platforms running verified reward programs

This document explains:

- Which projects to watch right now
- Where to find legitimate free crypto opportunities
- How to stay 100% safe from scams

Top Picks to Watch Right Now (Our Opinion)

1. Berachain ($BERA)

Berachain is one of the most talked-about Layer-1 blockchain ecosystems this year.

Why it matters:

- High ecosystem activity
- Strong DeFi + validator focus
- Actively rewarding early users

What you should do:

- Visit Berachain's official website & Twitter/X
- Join their Discord community
- Participate in testnets, quests, and ecosystem dApps
- Track announcements related to ecosystem rewards & airdrops
- Early participation = higher chances of rewards.

2.Story Protocol ($IP)

Story Protocol is building something unique — "Programmable IP (Intellectual Property)" on blockchain.

Why it matters:
- Strong creator-focused use case
- Rewards developers, creators, and early testers
- Growing rapidly in Web3 creator economy

What you should do:
- Explore their test environment
- Participate as a creator or tester
- Follow official updates for reward campaigns
- Projects like this often reward contributors, not just investors.

Where to Find Legitimate Free Crypto Opportunities:
- Global Trusted Platforms
- Binance / CoinMarketCap — Learn & Earn
- These platforms run verified, scam-free reward programs.

Why they are gold standard:
- Backed by top crypto companies
- No fake links
- No wallet-draining risks
- Educational + reward-based

How to use them:
- Complete short learning modules
- Answer quizzes
- Earn free crypto tokens directly

India-Specific Platforms (For Indian Users):
- WazirX / ZebPay
- Perfect for Indian users looking for:
- Sign-up bonuses
- Trading rewards
- Official airdrop announcements

What to do:
- Follow their official blogs & announcements
- Avoid third-party Telegram/WhatsApp links
- Participate only through verified platforms

These exchanges are among the primary regulated gateways for Indian crypto users.

STAY SAFE: THE GOLDEN RULES (READ THIS CAREFULLY)

- NEVER send money to "unlock" an airdrop
- NEVER share your private keys or seed phrase
- NEVER connect your wallet to links from random DMs

Always remember:

- Real airdrops are free
- Rewards come from official channels only
- Scammers create urgency — real projects do not
- If something feels rushed or too good to be true — it is a scam.

How to Track Projects & Opportunities Smartly

Instead of blindly following social media hype, use tools that help you research faster and safer.

AI tools like:
- ChatGPT
- Gemini
- Perplexity

Can help you:
- Understand project whitepapers
- Check token utility
- Track ecosystem announcements

To explore many such AI, crypto, and Web3 tools in one place, you can use platforms like Techyuni.com or their Chrome extension — it helps you discover trending free & paid tools at a single click.

Why These Were Chosen (Transparency Section)

Coins
Berachain ($BERA) and Story Protocol ($IP) were selected because:
- They are high-profile projects
- Have active or recent ecosystem reward distributions
- Strong community and developer backing (late 2025)

Platforms
- Binance / CoinMarketCap → Chosen for global reliability
- WazirX / ZebPay → Chosen to give India-specific, regulated access

This balance ensures global + Indian relevance.

DISCLAIMER (Important)

- Crypto investments are subject to market risks.
- I am not a financial advisor. This content is for educational purposes only.

Always:
- Do Your Own Research (DYOR)
- Verify official sources
- Understand risks before interacting with any crypto project

Your Next Step

You received this guide to stay informed, early, and safe.
Follow these updates carefully, avoid shortcuts, and focus on legitimate ecosystems.
